

Languages Faculty Transition work – French

I've listed some websites below that we use in Languages to help us learn and practise vocabulary. I have highlighted areas that would be useful to do before September.

www.blooket.com You can create an account and then on the 'discover' tab search for French numbers, French family members, French colours, French animals, French sports. There are lots of games to help you learn the vocabulary.

www.linguascope.com (username=deerpark / password = deer2023). Click on the French flag in the elementary section. Complete the sections that don't have yellow lines through.
